

2019 East Coast Shellfish Hatchery and Nursery Directory

Douglas Zemeckis, Ph.D.
County Agent III (Assistant Professor)
Rutgers Cooperative Extension

This directory is designed to identify shellfish hatcheries and nurseries from along the east coast of the United States, and to serve as a tool to provide a better link between shellfish seed suppliers and shellfish farmers. The directory includes contact information for each business, as well as some additional information indicating the type of operation and what products they expect to have available in 2019. Also included is the contact information for shellfish aquaculture extension agents in each state who can serve as additional resources to the industry.

Multiple people from along the east coast have reviewed content included in a draft of this directory. If there is an omission, then it certainly has not been intentional. If there are any suppliers who wish to and have not been included, they should contact the author for inclusion in the next publication. Also, this is not a complete list of all suppliers on the east coast given that some opted to not be included for 2019 or may not have been known to our team.

If someone is using this directory and cannot reach a business because the contact information has changed or is incorrect, then please contact Dr. Douglas Zemeckis, Rutgers Cooperative Extension (contact information below). If a new operation gets started, please encourage them to contact us to be added to this directory. This directory is updated annually, so please help to keep the information current for maximum benefit to all parties.

Finally, this information by no means suggests a recommendation about the quality of the products or services that these seed suppliers produce, and should by no means be construed as an advertisement for any of these companies by either the author or Rutgers Cooperative Extension.

Rutgers Cooperative Extension is an equal opportunity program provider and employer. Contact your local Extension Office (Ocean County, New Jersey: 732-349-1152) for information regarding special needs or accommodations. Contact the State Extension Director's Office if you have concerns related to discrimination (Rutgers University, New Jersey: 848-932-3584).

For corrections, more information, or to add a new operation, please contact:

ACKNOWLEDGEMENTS

Thank you very much to Gef Flimlin (Professor Emeritus, Rutgers Cooperative Extension) for starting the development of this annual directory that is being continued to support the aquaculture industry. Thanks to Kelly Jurgensen (Rutgers Cooperative Extension, Ocean County) for helping to produce this directory. The author sincerely thanks the Cooperative Extension and Sea Grant Extension Agents on the Atlantic and Gulf Coasts for their assistance in compiling this information. Those readers starting in the shellfish culture business should contact their extension agents or specialists to seek information about the culture process if they have any questions.
